

Animal Nursing Assistant Level 2

Welcome to West Suffolk College Animal Studies

Over the summer it is important that you prepare for your studies with us by undertaking a series of tasks. Some of these tasks may have already been sent to you.

Please complete ALL tasks in this workbook. This work needs to be handed in by **Friday 18th September**. Completing the elements of the workbook also shows willing and determination to work hard which is exactly the positive attitude we need to see from our new students.

First Aid:

First aid is a simple skill, but it has an incredible impact. This first aid advice section from St John's Ambulance website examines a range of common conditions and explains how you can treat them using first aid.

The Health and Safety (First Aid) Regulations 1981 require employers to provide adequate and appropriate equipment, facilities and personnel to ensure their employees receive immediate attention if they are injured or taken ill at work.

Complete the table below explaining how you would apply first aid to each scenario:

Scenario	First Aid
Wounds	
Burns	
Shock	
Unconsciousness	

Animal Welfare

The Animal Welfare Act 2006 is an important piece of legislation which you will become very familiar with during your time within Animal Studies.

The Animal Welfare Act sets out basic needs of animals which must be met. Failure to meet these needs is an offence.

The 5 Animal Needs are:

- ✓ The need for a suitable environment.
- ✓ The need to be housed with or apart from other animals.
- ✓ The need for a suitable diet.
- ✓ The need to be protected from pain, injury, suffering or disease.
- ✓ The need to exhibit normal behaviour.

Task 1:

Match the Animal Welfare needs to the correct example using the answer table below.

Animal Welfare Need	Example
A. Need for a suitable diet	1. Two friendly dogs being walked together, while a hamster lives alone
B. Need for a suitable environment	2. A rabbit having enough space to hop around
C. Need to exhibit normal behaviour	3. A guinea pig having hay, vegetables and clean water
D. Need to be housed with or apart from other animals	4. A vet treating an injured paw on a dog
E. Need to be protected from pain, injury, suffering and disease	5. A cat having quiet hiding spaces and toys

Answers:

A	
B	
C	
D	
E	

Task 2: Personal Hygiene Poster

Produce a poster detailing:

- Why personal hygiene is important when working with animals
- PPE considerations
- Why we use alcohol hand gels and how to apply them
- The WHO hand washing technique.

Utilise the information on the Animal Centre Induction pack and your own research.

This work is the first of your assignments which will need to be submitted for marking as it forms part of your Principles of Infection Control Portfolio.

Well done for completing your summer workbook! Now to check your understanding of the course and the workbook contents please use the following link or QR code to complete the end of workbook quiz.
