

Level 3 Esports

Esports Summer Project 2026 Instructions

Esports Summer Project 2025

Welcome to the Level 3 Esports course at West Suffolk College.

This summer project has been designed to help you explore the esports industry and start thinking about the wide range of career opportunities available. By completing this project, you will develop your research skills and gain a better understanding of the roles that support professional esports teams, events, and organisations.

Your task is to research the esports industry and investigate a variety of careers within it. You will explore at least 10 different job roles, including some lesser-known careers, and explain what each role involves, the skills required, and possible career progression routes.

After completing your research, you will choose one role that interests you the most and investigate it in greater detail. You will create a job description and person specification for the role and then evaluate your own skills, experiences, qualifications, and interests against the requirements of the position. This will help you identify your strengths and areas for development as you begin your esports studies.

Finally, you will write a short conclusion reflecting on what you have learned about the esports industry, the career that interests you most, and the steps you may need to take to achieve your future career goals.

A template has been provided to help you structure your work. The websites listed below are a good starting point for your research, but you are encouraged to use a range of reliable sources to gather information.

Please complete the project and submit it before the start of the academic year. Make sure your name is clearly displayed on the cover page so that your work can be identified.

The Completed task should be emailed to: ben.lewis@easterneducationgroup.ac.uk

What do you need to do?

Part 1 – Research Esports Careers

1. Write a short introduction explaining:
 - What esports is.
 - How esports has grown over the years.
 - Why esports is now a major industry.
2. Research **at least 10 different esports job roles**.
For each role, include:
 - What the job involves.
 - Main responsibilities.
 - Skills needed.
 - How someone could progress into that career.

Examples include:

- Professional Player
- Coach
- Team Manager
- Analyst
- Commentator (Shoutcaster)
- Event Organiser
- Social Media Manager
- Content Creator
- Game Developer
- Marketing Specialist

3. Research **2 lesser-known esports careers** and explain:
 - What they do.
 - Why they are important to the esports industry.

Part 2 – Investigate One Career in Detail

Choose **one esports career** that interests you the most.

For this role:

1. Explain why you chose it.
 2. Create a job description including:
 - Job title
 - Overview of the role
 - Main responsibilities
 3. Create a person specification including:
 - Skills required
 - Qualifications needed
 - Experience employers may look for
-

Part 3 – Evaluate Yourself

Think about how well you currently match the role you selected.

Consider:

- Your skills
- Your qualifications
- Your work experience
- Your hobbies and interests

Then answer:

- What strengths do you already have?
 - What skills or experience do you need to develop?
 - What actions could you take in the future to improve?
-

Part 4 – Conclusion

Write a short conclusion explaining:

- What you learned about the esports industry.
 - What career interested you most.
 - What you need to do to achieve your chosen career goal.
-
